

CATARRH FIRST A COLD THEN CATARRH THEN CONSUMPTION

A cold in the head is a common ailment, but it rarely ever stops there. It often grows stubborn and protracted, the mucous membranes, or inner lining of the body, become inflamed and secrete a filthy, unhealthy matter which is absorbed by the blood and soon produces that disgusting disease, Catarrh. Then follow the unpleasant symptoms of "hawking and spitting," ringing noises in the ears, headache, poor appetite, mucus dropping back into the throat, and a feeling of general debility. Every day the blood becomes more heavily loaded with these poisonous secretions, and if the trouble is allowed to run on, the lungs become diseased from the constant passage of poisoned blood through them, and then Catarrh terminates in the most dreaded and fatal of all diseases, Consumption. The only way to get rid of Catarrh permanently is to cleanse the blood, and S. S. S. is the ideal remedy for this purpose. It soon clears the system of all impurities, purges the blood of all Catarrhal matter and poisons, and effectually checks the progress of this dangerous and far-reaching disease. S. S. S. keeps the blood in perfect order so that Catarrh cannot remain; and as this pure, healthy blood goes to every nook and corner of the body, the entire system is strengthened and invigorated, and the symptoms all pass away. Book with information about Catarrh and medical advice free.

JIM CROW BILL IN JACKSONVILLE

ORDINANCE ADOPTED REQUIRING SEPARATION OF RACES ON STREET CARS.

The Jacksonville Times-Union of Wednesday says: By a vote of ten to four the City Council last night passed the ordinance commonly known as the "Jim Crow" law, which provides for a separation of races on the street cars of the city.

The bill was called up on its second reading by Councilman Bowden of the Seventh Ward and was adopted, section by section, without a word of opposition, until it came to adopting it as a whole on its second reading. Then Councilmen Ross and Wetmore made vigorous protests against it.

Councilman Ingram also opposed the bill but his opposition was on the grounds that it was not drastic enough. He did not approve of any imaginary line of separation in the cars, but thought that separate cars should be required.

The bill was passed on its second reading, and upon the roll being called on the third and final reading the vote was as follows:

How They Voted.
For the bill: President Baker and Councilmen Bettles, Bowden, Brown, Holt, Hirschman, Lillenthal, Owen, Riles, Slager—10.
Against the bill: Councilmen Ingram, Smith, Ross and Wetmore—4.

No explanation was made by Councilman Smith as to his vote against the bill.

President Baker announced that upon approval by the Mayor and proper publication, the ordinance would become a law.

There are four councilmen absent.

Weather Signs.

"If the chickweed and scarlet pimpernel expand their tiny petals rain need not be expected for a few hours," says a writer.

"Bees work with redoubled energy just before a rain. If the flies are unusually persistent either in the house or around stock there is rain in the air. The cricket sings at the approach of cold weather. Squirrels store a large supply of nuts, the husks of corn are unusually thick and the buds of deciduous trees have a firmer protecting coat if a severe winter is at hand. If the poplar or quaking aspen leaves turn up the underside rain will soon follow.

"If the camphor bottle becomes noisy it is going to storm. When it clears settled weather may be expected. This idea has seemingly been utilized in the manufacture of some of our cheap barometers. The main trouble is they seldom foretell the change until about the time it arrives.

"Last, but not least, rheumatics can always tell it 'in their bones' when a storm is approaching, and of this prognostication the octogenarian of today is as firm an advocate as were his forefathers."

BOARD OF WORKS TO HOLD A MEETING

And Select a Street Superintendent to Succeed Chas. H. Gingles.

The Board of Public Works will hold a special session today, convening at 10 a. m., when the matter of appointing a street superintendent to succeed Chas. H. Gingles will be taken up and some one chosen.

The office was declared vacant by the board yesterday afternoon, but no one was chosen to fill the position. Assistant Street Superintendent Spottswood has been filling the position since the departure of Mr. Gingles.

At present there are no applicants for the position with the exception of Capt. J. A. Daw, who has been assisting in the work since the breaking out of the fever, or since he was asked to help out during the emergency.

He has done satisfactory work for the city during this time, and has shown that he is competent to hold the position. It is known that some members of the board favor his appointment.

MURDERER SAVED FROM GALLOWES

PARDONING BOARD COMMUTED SENTENCE OF "BLACK KID" TO LIFE IMPRISONMENT.

The Jacksonville Metropolis says: David Mitchell, alias "Black Kid," will not hang. The Pardoning Board in session at Tallahassee a few days ago commuted his death sentence to life imprisonment.

Attorney A. Z. Adkins, of Bradford county, according to the Starke Telegraph, appeared before the board on Thursday last with letters and papers bearing on the mental condition of the negro and made a strong plea in his behalf. The board took the case under advisement, and on Saturday Mr. Adkins was advised by telegraph that the sentence had been commuted.

Mitchell deliberately killed a negro man and woman at Lawley and was convicted of murder in the first degree, and was sentenced to hang. Two death warrants were read to him. The first was recalled because the regularity of the term of court at which he was convicted was questioned by the attorney for another negro convicted at the same time. This question being settled, another warrant for the execution of Mitchell was issued, and all preparations had been made to hang him. On the day before the execution was to take place Attorney Adkins wired the Governor his belief that the negro was insane. After much telegraphing a respite was granted, and two hours before the time for the hanging, Sheriff Bennett received telegraphic instructions to stay the execution. The efforts of Attorney Adkins since that time finally resulted in the saving of the negro's neck.

Instead of paying the death penalty "Black Kid" will leave in a few days, in charge of a guard, to serve a life sentence in the chain-gang.

The gallows that was built for his execution will probably be torn down and used for kindling wood.

Now the public will not be a bit surprised if in a few months it shall learn that Mitchell has succeeded in making his escape, as so many other murderers have done, and another murderer with be at large.

COFFEE NEURALGIA Leaves When You Quit and use Postum.

A lady who unconsciously drifted into nervous prostration brought on by coffee, says:

"I have been a coffee drinker all my life, and used it regularly, three times a day.

"A year or two ago I became subject to nervous neuralgia, attacks of nervous headache and general nervous prostration which not only incapacitated me for doing my housework, but frequently made it necessary for me to remain in a dark room for several days at a time.

"I employed several good doctors, one after the other, but none of them was able to give me permanent relief.

"Eight months ago a friend suggested that perhaps coffee was the cause of my troubles and that I try Postum Food Coffee and give up the old kind. I am glad I took her advice, for my health has been entirely restored. I have no more neuralgia, nor have I had one solitary headache in all these eight months. No more of my days are wasted in solitary confinement in a dark room. I do all my own work with ease. The flesh that I lost during the years of my nervous prostration, has come back to me during these months, and I am once more a happy, healthy woman. I enclose a list of names of friends who can vouch for the truth of the statement." Name given by Postum Co., Battle Creek, Mich.

There's a reason. Ten days' trial leaving off coffee and using Postum is sufficient. All grocers.

Grin

and bear your SUFFERING, if you prefer, but you will find life pleasanter, if you will cure the pains with that great, modern pain remedy, HAMLINS WIZARD OIL.

All pain is caused by some form of inflammatory action. Hamlin's Wizard Oil drives out the inflammation and thereby relieves and cures the pain.

There is no other relief and cure known to medical science for the pains of rheumatism, neuralgia, indigestion, earache, headache, toothache, and for injuries such as bruises, sprains, cuts and burns, etc., so certain and safe in results as Hamlin's Wizard Oil. Price 50 cents and \$1.00. Fully guaranteed.

FLORIDIANS KIN TO ROOSEVELT

Has Second Cousin in Jacksonville and Other Relatives Throughout the State.

George W. Stewart, of the Stewart-Bernstein Company, says the Jacksonville Metropolis, is a second cousin to Theodore Roosevelt.

The history and genealogy of the Stewart-Elliott-Dunwoody families, issued in 1895 by Joseph Bullock, clearly shows this.

Both George Stewart and Theodore Roosevelt are grandsons of Gen. Daniel Stewart, who was a gallant soldier in the Revolutionary war.

Gen. Daniel Stewart had several children, among whom were Martha Stewart, who married John Elliott. To the latter was born a daughter, Hester, who married James S. Bullock, who in turn had a daughter named Martha, who married Theodore Roosevelt, the father of the present President of the United States.

Charles Clifford Stewart, a son of Gen. Daniel Stewart, married Marion Polot, and the issue was two sons, one of whom is George Stewart, of this city.

Charles Stewart died in 1857, and his widow married the late Col. T. A. MacDonell, who was for years a prominent lawyer in Jacksonville.

The pamphlet giving a history of the antecedents of President Roosevelt has much information regarding the Stewarts, several of whom lived in Florida. Among the latter were William Stewart, who lived on the Savannah river; George W. Stewart, Sr., who lived in Newnanville, and Matilda Stewart, who married G. L. Brown, of Ocala.

Several descendants of the Bullocks and Stewarts reside in Florida, and President Roosevelt consequently has several relatives in this state.

DEATH THIS MORNING OF MRS. REBECCA GOLAY

The many friends and acquaintances in Pensacola of Mrs. Rebecca Golay will be pained to learn that she expired this morning at 2 o'clock, after an illness covering a period of several months.

Death occurred at the home of her daughter, Mrs. Runyan at Little Bayou. The deceased had reached the advanced age of 89 years and leaves a large number of relatives and friends to mourn her loss.

The hour of the funeral has not yet been announced.

Some Seasonable Advice.

It may be a piece of superfluous advice to urge people at this season of the year to lay in a supply of Chamberlain's Cough Remedy. It is almost sure to be needed before winter is over, and much more prompt and satisfactory results are obtained when taken as soon as a cold is contracted, and before it has become settled in the system, which can only be done by keeping the remedy at hand. This remedy is so widely known and so altogether good that no one should hesitate about buying it in preference to any other. It is for sale by all druggists.

HOW TO PREVENT THE YELLOW FEVER

Marine Hospital Service Issues Circular For Display at Post Offices.

The following circular has been issued by the Public Health and Marine Hospital Service and sent broadcast over the country. It is being displayed in all postoffices and other prominent places and will, no doubt, have an excellent effect:

No Mosquitoes—No Yellow Fever.
Treasury Department, Bureau of Public Health and Marine Hospital Service.

Note.—The measures herein mentioned were recommended by the Army medical board of 1900, and have been endorsed by the American Public Health Association and by the First International Sanitary Convention of American Republics. They have also been justified by the experiences and observations of the two working parties of the Yellow Fever Institute of this Bureau in Vera Cruz, Mexico, and by the commission of the Pasteur Institute of Paris, France, operating in Rio Janeiro, Brazil. The measures have been tested successfully on a large scale in Havana, Cuba, and during the yellow fever epidemic at Laredo, Texas, in 1903.

The infection of yellow fever is carried by mosquitoes, and by no other means is the infection spread.

Persons take the disease by being bitten by mosquitoes that have previously bitten a yellow fever patient.

The mosquitoes to become infected must bite a yellow fever patient during the first three days of his attack. These first three days, therefore, are the most important time for preventing the access of mosquitoes to a fever patient.

It is often difficult to decide during the first three days whether a patient has yellow fever; hence the necessity in threatened communities of placing a mosquito bar immediately around every patient who has fever of any kind, and for three days at least.

Facts About Screening.
1. The netting used should have meshes fine enough to prevent the passage of mosquitoes (at least 18-20 meshes to the inch.)

2. It is important to screen the windows and doors of the house. It is doubly important to screen the beds of fever patients.

3. Mosquitoes can bite through mosquito nets when any part of the patient's body is in contact with the netting.

4. Frequent examinations should be made to see that there are no torn places in the netting or that no mosquitoes have found a lodgment inside.

5. The netting should be well tucked in to keep mosquitoes from entering.

6. If mosquitoes are found within the netting they should be killed inside and not merely driven or shaken out.

7. All cases of fever should be promptly reported to the local health officer. Awaiting his arrival they should be covered with mosquito bar.

8. Mosquitoes live in the vicinity in which they breed. They do not of ten fly a long distance.

9. Mosquitoes breed only in water—usually in artificial collections of fresh water.

10. The young mosquito, or wriggler, lives in water at least seven to twelve days. Although the wigglers live in water, they must come frequently to the surface to breathe.

11. Coal oil on the surface of the water prevents the wigglers from breathing.

12. Destroy the breeding places and you will destroy the mosquitoes.

13. Empty the water from all tubs, buckets, cans, flower pots, vases, once every forty-eight hours.

14. Fill or drain all ponds, ditches, unfilled postholes, and the like.

15. Change regularly every day all water needed in chicken coops, kennels, etc.

16. Treat with coal oil all standing water which cannot be screened or drained (1 ounce of oil will cover 15 square feet of surface). The oil does not effect the water for use if the water is drawn from below.

17. Where oil is applied to standing water it must be distributed evenly over the surface.

18. Put fine wire netting over cisterns, wells, and tanks of water in everyday use.

19. Places in which it is undesirable to put oil, such as watering troughs for stock, lily ponds, and so forth, can be kept free from wigglers by putting in goldfish or minnows.

20. Clean away all weeds, grass and bushes about ditches, ponds, and other possible breeding places, since these afford a hiding place for the mosquitoes.

21. Clean up vacant lots and back yards of all cans, tins, bottles, and rubbish.

22. First do away with, or treat, all places where mosquitoes are known to breed, and then begin to work on places where they might breed.

23. Inspect and treat with coal oil, gutters, culverts, ditches, manholes, catching basins, etc., along the roadside. Manhole covers should be screened.

24. Houses should be cleared of mosquitoes by burning 1 pound of insect powder or 2 pounds of sulphur to 1,000 cubic feet of space. The mosquitoes will all to the floor and should be collected and burned.

DRAGGING

down pains are a symptom of the most serious trouble which can attack a woman, viz: falling of the womb. With this, generally, come irregular, painful, scanty or profuse periods, wasteful, weakening drains, dreadful backache, headache, nervousness, dizziness, irritability, tired feeling, inability to walk, loss of appetite, color and beauty. The cure is

WINE OF CARDUI Woman's Relief

that marvelous, curative extract, or natural essence, of herbs, which exerts such a wonderful strengthening influence on all female organs. Cardui relieves pain, regulates the menses, stops drains and stimulates the muscles to pull the womb up into place. It is a safe and permanent cure for all female complaints.

WRITE US A LETTER
In strictest confidence, telling us all your troubles. We will send free advice (in plain sealed envelope). Address: Ladies' Advisory Dept., The Chattanooga Medicine Co., Chattanooga, Tenn.

"I SUFFERED AWFUL PAIN
In my womb and ovaries," writes Mrs. Naomi Baker, of Webster Groves, Mo., "and my menses were very painful and irregular. Since taking Cardui I feel like a new woman, and do not suffer as I did."

MARSTON & QUINA,

108-110 S. Palafox St. Phone 148. Pensacola, Fla.

never is carried by a single species of mosquito (the Stegomyia), to insure its destruction it is necessary to destroy all mosquitoes.

In places liable to yellow fever both individuals and communities have an effective method of protecting themselves, as indicated above. Use the mosquito bar at once over all cases of fever until the danger from yellow fever has passed. Destroy all mosquitoes.

WALTER WYMAN, Surgeon-General
